In Murthy and Wadsworth (*Current Biology* 15, pp. 724–731), the Figure 1C legend should have read: “Graph of GFP-actin fluorescence intensity in the contractile ring.” The second-to-last sentence in the legend for Figure 2 should read: “Corresponding graphs of recovery are shown in (A) and (C), and in (B), a graph of recovery for a representative cell in early anaphase is shown; the solid line shows fluorescence in the bleached region, and the dotted line shows fluorescence in an unbleached region.” The Acknowledgments section should have included the following sentence: “This work was supported by National Institutes of Health grant GM059057 to P.W.”
